Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 3-6 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only. See MPEP § 608.01(n). Accordingly, the claims 3-6 have not been further treated on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the spring effect" in lines 3 and 4. There is insufficient antecedent basis for this limitation in the claim.

3. The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

Parenthetical comments, references to figure numbers, and ambiguous language including: may vary depending, approximately, e.g. etc. should be omitted.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Fitzgibbons US Patent Application Publication 2004/0016170 A1. Fitzgibbons discloses a tool capable of lifting and repositioning a log in a fireplace, having a handgrip (80) on one end, a connecting rod in the middle (90), and on the other end an open-jawed mouth formed at an angle that is capable of gripping a log using friction created by a spring effect of the open-jawed mouth and a series of friction ridges (70) around the inner perimeter of the mouth (figure 1); a wedge tip (60) on the side of the mouth opposite the connecting rod approximately two inches beyond the side of the mouth (figure 2).

5. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by McKinney et al. McKinney et al discloses a fish gaff capable of lifting and repositioning a log in a fireplace, having a handgrip (12) on one end, a connecting rod in the middle

(13), and on the other end an open-jawed mouth (jaws 14 and 15) formed at an angle that is capable of gripping a log using friction created by a spring effect (spring 30) of the open-jawed mouth and a series of friction ridges (17) around the inner perimeter of the mouth (figure 3); a wedge tip (bottom 17) on the side of the mouth opposite the connecting rod approximately two inches beyond the side of the mouth.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 6571505, US 1489581.
